How to scan a QR code

Launch the camera on your phone and point the phone's lens at the QR code. The phone will automatically scan the QR code. Alternatively, launch the QR scanning app and proceed similarly.

How to apply it to your car window

Stick it on the side window of the car, on the right or left side. We do not recommend sticking to the windshield, which is angled, which makes it more difficult to scan the QR code.

How to put a photo in your ad

Add a QR code as another photo to your ad. Popular websites allow you to add photos up to 5 MB in size with a resolution of 1080 x 720 px. The file you received from us with the ordered report meets these requirements. Just add a photo to the gallery of the vehicle you are selling.
